OFFICE OF THE ASSISTANT SECRETARY
RESEARCH, DEVELOPMENT AND ACQUISITION
1000 NAVY PENTAGON
WASHINGTON DC 20350-1000

28 August 1995

MEMORANDUM FOR DISTRIBUTION

Subj: DON IMPLEMENTATION MEMO 95-8, CRITERIA FOR DEPARTMENT-WIDE
WAIVER APPROVAL

Ref: (a) ASN(RD&A) memo dated 21 Dec 94 on Navy Implementation of
DoD Policy on Specification and Standards Reform

Encl: (1) Approval Criteria For Department-Wide Waiver

Reference (a) allows for the approval of Department-wide waivers by the DoN Standards Improvement Executive for the use of military specifications and standards in acquisitions. Enclosure (1) provides the approval criteria for the waiver requests submitted by the Command Standards Improvement Executives.

Program Offices and Buying Commands are encouraged to utilize the criteria contained in enclosure (1) for their rationale in justifying program-unique waiver requests for ACAT I -IV programs. CSIEs are requested to ensure that enclosure (1) criteria is distributed to the appropriate field buying commands.

Approval Criteria For Department-Wide Waiver

Department-Wide waivers will be approved when the cited military specifications and standards are needed to be used for all applications across DoN acquisitions. Tailoring of the requirements contained in the waived military specification and standards shall still be accomplished where appropriate. The military specifications and standards waived shall be needed in the solicitation to address the following concerns:

1. Safety considerations where loss of life, or severe equipment damage, is a significant risk.
2. Supportability requirements where consistency with the DoN logistic infrastructure is required.
3. System or equipment performing in uniquely DoN environments or in military-unique applications, e.g., nuclear blast or EMI.
4. Requirements are performance-based, i.e., military standards in a non-exempt category for waivers but having requirements written in performance terms.
5. Processes stipulated are accepted commercial practice in which either the DoD has the technology lead or the military specification or standard is being transitioned to a commercial or non-Government standard.
